MANUFACTURING TO BESPOKE REQUIREMENTS DATING BACK 165 YEARS.

Tomlinson Parbans have provided generations of long standing timber solutions.

EXACTING MODERN STANDARDS AND TRADITION COMBINED.

A COMPANY AND JOINERY MADE TO LAST

At Tomlinson Parbans Joinery we employ time served joiners and the majority have been with us for many years. We've built an excellent reputation for quality bespoke joinery using a combination of traditional and state of the art techniques.

Our business success has been built on long lasting relationships with our customers who enjoy the reliability and high level of service we provide.

Each of our joiners are responsible for their project from start to finish. This responsibility produces a consistent quality and more-so, creates a feeling of pride which is paramount for job satisfaction which shows in our finished products.

We have a well respected management team who co-ordinate your project to make sure we deliver to the highest standards.

OUR PEOPLE.

IT'S NOT JUST EXPERIENCE THAT COUNTS

With over 165 years of experience, our family business has a wealth of knowledge which has been handed down throughout the generations, continuously improving our skills and products.

Morale plays a big part in our organisation, from the office staff to the shop floor, motivation is the key to be the best we can be for our customers.

All our people are trained to high standards and are all happy to share their skills. Some projects require a collective team effort and in these instances they work together to achieve perfect results.

Our people are hard working and conscientious, always open to learning new techniques and go beyond the call of duty to meet their goals.

We take great pride in what we deliver and every finished project represents the individual or team responsible for it's production.

During the 2nd World War, Tomlinson Parbans were a strategic Timber Depot for the storing of Greenheart Timber which the government used to repair the Manchester Ship Canal Locks and Docks.

WORKING FOR OUR CUSTOMERS SINCE 1850.

Continuing a business founded by the
Tomlinson Family in 1850.

“
We love what we do
and it shows in the
finished products.

”

EFFECTIVE PROCESSES

**A good team understands and
agrees their objectives.
At Tomlinson Parbans
Joinery there's no exception.**

Our people understand each others
roles, have good communication
skills and trusted leaders to help
implement and review decisions to
co-ordinate our resources.

“
As part of our service,
we can tell you what
U-Value your windows
will achieve.
”

OUR CUSTOMERS.

ARCHITECTS, CONTRACTORS AND HOME OWNERS

Whether working from drawings, replicating an existing piece or interpreting our customers ideas, we're able to produce exactly what our customers want.

Good communication with our customers helps us work closely together, keeping them involved with each project at all relevant stages of production.

If our customers require a fitting service we are happy to recommend the best suited contractor for each individual project.

We only recommend trusted contractors who we have worked closely with for many years.

As well as our joinery service we also have a huge stock of related hardware products, tools and an extensive timber yard. We have a knowledgeable team at the trade counter who are always happy to help.

CASE STUDY 1.

WITS END FARM PROJECT

This stone farmhouse was built in 1995 but unfortunately the windows were made from a softwood. With the house being fairly exposed it didn't take too many years for the windows to rot through.

We were asked to produce replacements from a pre-finished European oak as our customer thought that was the best alternative material.

To create the high performance storm casement windows required to keep the weather at bay, we recommended Accoya® with Teknos Cotswold Oak Finish. We also created new Cottage Style doors and everything produced incorporated modern security with traditional styling.

A PLEASURE TO WORK WITH

“Tomlinson Parbans offered the experience and advice to help produce exactly what I needed.

Our doors and windows are stunning and will last for many years to come. They are a pleasure to work with.”

Owner of Wits End Farm

MATERIALS.

SUITED FOR EACH PROJECT

A new installation has to look good and last, so it is imperative that we choose the right material for your project.

If you are unsure which product to use for your project we'll be more than happy to help you make the right decision.

Accoya®

Accoya® provides the best dimensional stability ideal for external use and is guaranteed against rot for 50 years.

Cedar

Western red cedar is ideal for exterior joinery where a stain or oil is used to enhance its rich colour. It is most suited for garage doors, gates and cladding.

Oak

Oak provides a stylish timeless finish. It is relatively low maintenance whilst being extremely strong and durable providing protection against weather.

Softwoods

There are various softwoods, they are a sturdy and popular timber, with distinctive knots and markings. Most commonly used for interior joinery.

OUR PREFERRED MATERIAL IS ACCOYA®

Accoya® wood has been thoroughly tested for dimensional stability, durability and paint retention to ensure optimal performance. Indeed, it is so reliable that for many years it has been – and continues to be – used by scientists as the benchmark against which other treatments and modifications are measured. It is guaranteed against rot for 50 years.

These are a few of the features you can benefit from:

NATURALLY INSULATING

- Offers improved thermal insulation in comparison with commonly used wood species
- Ideal for applications where energy conservation is important

NON TOXIC & RECYCLABLE

- Protects the environment from the harmful effects of common treatments
- May be safely reused and recycled

CONSISTENT QUALITY THROUGHOUT

- Consistent, measured modification quality from surface to core
- No need to apply chemical preservatives when cut or planed

SUSTAINABLY SOURCED

- Including FSC®, PEFC and other regionally certified woods
- Naturally renewable

RETAINED STRENGTH & HARDNESS

- The process does not compromise the wood's strength
- Hardness is increased
- High strength to weight ratio makes it suitable for challenging applications

CASE STUDY 2.

THE FINISHING TOUCHES FOR A STUNNING RESTORATION

This is an outstanding Grade II listed cottage, beautifully restored throughout with some superb features, located in the village of Disley.

Disley Hall is a holiday let refurbished by one of our long standing customers, finished and furnished to the highest standards.

Our job was to work closely with the owners and our customer to make sure the detail and finish for the windows, doors, gates and internal staircase would both complement the property and at the same time be sympathetic to the character of the cottage.

The preferred material used was Accoya® for its stability and longevity. As a holiday let it is important that there is little maintenance and that it would remain attractive, lasting for many years to come.

'We've been working with Tomlinson Parbans since the 1980's, for the simple reason, they give us piece of mind.'

We need the support from reliable, conscientious suppliers. We know that we can depend on Tomlinsons to provide the consistent quality we expect.'

”

EXACTING MODERN STANDARDS.

A traditional look and feel with the durability that only modern materials can achieve.

“

A robust topcoat
available in any colour
you choose.

”

TEKNOS is an industrial topcoat for wood designed for exterior use.

We apply TEKNOS using state of the art spraying systems. Known for its exterior durability, it is our preferred coating for any of our paint finish projects. It is a robust topcoat, which typically is used for exterior windows and doors.

THE PERFECT FINISH.

Accoya® readily accepts both translucent and opaque TEKNOS coating systems which extends the coating life of its already inherent stability.

THE FINISHING TOUCHES.

PREPARING FOR THE RIGHT FINISH

Before any of our projects are coated it's imperative that all our joinery work is seamless! As important as the joinery itself is the preparation of the surface before it goes for coating.

All our products are checked for imperfections and cleaned prior to applying any finishes. This not only provides the best visual finish but ensures a longer lasting product.

IT'S ALL IN THE DETAIL

We can offer a number of different furniture styles, finishes and colours to complement your project.

We can also fit any supplied bespoke furniture to your doors and windows should you prefer.
